Summary of Information

Site is curvy, light colored and light grey, smooth, rough, but also with squarish components, is hard, angular, many varying dimensions; it is lighted, with a sense of a spot light directed on something in the middle of an inside, wide-open area, the rest of the surroundings somewhat dim. Object sits in a specific, open area—sense that it isn't presently meant to move, but has moved/been moved in the past, especially to get where it is now. It doesn't do much of anything but "sit there" and be observed. There is a slight sense of "commemoration" about it. Search exercise located it somewhere in eastern portion of Pennsylvania.
